JULIA E. WHALEN READY TO SAIL

The schooner Julia E. Whalen, Capt. Rosehill, will sail tomorrow for Marcus Island, equipped in every way to take possession. She will have fourteen souls on board.

The crew and passengers of the schooner will consist of her captain, mate, cook, four sailors, five laborers, and the chemist of the company, Professor T. P. Sedgwick of the United States Agricultural Experiment Station. The Bishop Museum will send a naturalist to report upon the fishes, birds and flora of the island, and it is possible that the Mackay Company will send a representative to accompany the expedition for the purpose of examining the island and its approaches to determine as to its availability as a cable station.

The schooner is well equipped. She has an adequate supply of provisions, tools, and supplies of all kinds, including a laboratory. The island will be surveyed, the rock phosphate beds thoroughly explored, and several hundred samples secured.

A question which is agitating the minds of some people is whether international complications will ensue because of the Japanese found there. Both Mr. Peacock, the president of the company, and Mr. Fitch, the vice-president, laugh at the idea of meeting an opposition from the Japanese fishermen on the island. They say that a party of about 20 Japanese fishermen have been in the habit of camping on the island for a few months every year, fishing and curing fish for the Yokohama market. But they do not remain permanently, have no houses or settlement there, and the government of Japan has no sovereignty there.

But Captain Rosehill will carry all the authority he possibly can. He has with him a certified copy of the license granted him by the United States government to occupy the island. He will also have credentials from the Japanese embassy commending him to the friendship and assistance of any Japanese who may be found on Marcus. If these do not go with the Japs he has another weapon. This weapon is a plentiful supply of Japanese and Mexican money, which he may use to hire the celestials for digging and packing guano.

The Whalen is a trim craft. She is a fast sailer and is expected to reach the island in about 22 days. She will probably remain there a month while the island is being thoroughly explored and will be back in Honolulu with her cargo of samples by the latter part of September.

Marine Railway Work.

The steamer K. A. Hou, which has been undergoing cleaning, painting and caulking on the marine railway since July 3, will be ready for the water again tonight and the steamer Kauai will be hauled up for cleaning.

"World's Entertainers" Returning.

Word comes from Sydney by the Ventura that a number of the members of Messrs. Lee and Riels "World's Entertainers," will be returning to America shortly and that they would like to play again in Honolulu.

PASSENGERS.

Arrived.
